

Passwork: Secure Password Management for Businesses and Organizations

Passwork is an advanced password management solution developed by Barcelona-based Passwork Europe SL.

Designed for businesses and organizations of all sizes, Passwork allows you to securely store and manage credentials with flexible deployment options: on-premise (self-hosted) or cloud-based.

Why choose Passwork?

- Complete control over data and secure access
- Compliance with the most demanding safety standards
- Scalability to adapt to growing teams and companies
- Intuitive interface for efficient credential management

Passwork provides a robust and flexible solution for password management, ensuring the protection of sensitive credentials and optimizing access across the organization.

QUALITEASY INTERNET SOLUTIONS is an authorized Passwork partner, offering exclusive conditions for companies and organizations with full support for pilot projects.

Features and Benefits

Easy Integration with Enterprise Systems

- Supports LDAP, SAML SSO, and Active Directory for seamless authentication
- Open API for integration with existing tools and workflows

Enterprise-Grade Security

- AES-256 encryption for maximum protection of data
- Two-factor authentication (2FA) for enhanced security
- GDPR compliance

Licensing and Deployment Options

- On-premise or cloud implementation
- Flexible licensing models
- Scalable solution for companies of any size

Quick and Convenient Access

- Available as a mobile app and browser extension for easy login management
- Efficient organization through labels, folders, color codes and shortcuts

Centralized and Secure Password Management

- Passwork offers structured storage of passwords in secure vaults with different levels of access for teams, departments, and individual users

Advanced Access Control

- Role-based permission management to restrict access to credentials of your choice
- Granular control to efficiently monitor and regulate permissions
- Detailed activity logs for security monitoring and regulatory compliance
